

# SHEET METAL STORAGE SOLUTIONS

RELEASE FLOOR SPACE AND IMPROVE ACCESS  
TO SHEET METAL PLATE AND BLANKS

Manufactured in the UK, our sheet metal storage racking system is designed to offer a safer and easier way to handle and store various sizes of metal sheets both inside and outside. Available up to 12 metres high and with a capacity of up to 20,000 kg per location.

## Features for Sheet Metal Storage

- Systems up to 12 metres high
- Manufactured from heavy duty universal beam sections
- Painted any colour or galvanised for external use
- Up to 20,000 kg per location
- Wide range of accessories
- External sheet metal storage systems can be roofed and clad becoming purpose built storage.

Depending on the weight and overall dimensions of your sheet metal, either Cantilever Racking or Heavy Duty Racking could be ideal for your Sheet Metal Storage.

DESIGNED AND MANUFACTURED IN THE UK

# SHEET METAL STORAGE SOLUTIONS

RELEASE FLOOR SPACE AND IMPROVE ACCESS  
TO SHEET METAL PLATE AND BLANKS

Sheet Metal Racking Systems could benefit your company by:

- Increasing vertical storage capacity
- Allowing access to selective stock
- Speeding up handing of materials
- Available for external usage

## RACK CLAD BUILDINGS

If space is an issue, a complete Rack Clad Building System can be supplied for a secure, cost-effective storage solution, which offers additional protection from the elements for your valuable material stock.
