# SECURITY: PROTECT YOUR MOST VALUABLE ASSETS WITH OUR ALL NEW SECURE PARTITION SYSTEM.

## SECURE

Solid construction creates additional level of protection against unauthorised access, theft or criminal damage.

## MODULAR

Modular panels, posts and doors allows storGUARD to be easily configured into a number of designs.

## FAST INSTALLATION

Unique bolt-less bracket and pin mechanism results in a fast installation requiring minimal tools.

## ECONOMICAL

Suitable for all applications, budgets and security needs. Can help to reduce crime levels and insurance premiums.

## DURABLE

Framed steel panels with a variety of finishes to ensure strength and durability for long lasting warehouse security.

## Ask about our **ALL NEW** stor**GUARD™** system.

- **Stronger Design**

We have bulked up each of our components to ensure a stronger & more reliable product.

- **Rapid Installation**

We have reduced installation times by 30% with the introduction of our unique post-clip system.

- **Industry Standard Sizes**

We listened to your feedback and brought our newly designed panels in line with industry-standard sizes.

stor**GUARD™** is a modular system comprising of mesh-panels and posts to create secure structures within warehouse and manufacturing premises. This carefully constructed system was designed to create rooms and divisions which prevent unauthorised personnel access and create a barrier between your workforce and machinery.

Steel Partitioning is a great way to create restricted access areas for quarantine goods, hazardous substances or high-value items. This easy to install system can be supplied with hinged or sliding doors, in range of mesh apertures.

Our stor**GUARD™** partitions are created with framed panels which provides strength and rigidity to for long-lasting warehouse security. Made from welded wire mesh, each panel is supported by sturdy steel posts which bolt directly to the floor.

## PANELS

Our lightweight panels feature a 20x20mm box section frame, surrounding mesh in 25x25mm or 50x50mm apertures. Available in a full range of standard sizes, although bespoke options are always available.

## POSTS

Our improved posts are now constructed in 60x60mm box section, with our newly designed footplate for maximised stability. Posts are no longer drilled and designated as "corner" or "in-line", and instead can now be used as "universal" posts able to be fitted in any position. Standard sizes available, with splice kits to extend posts to any height.

## CLIPS

Our brand new post clip system, unique to QTS, now prevents the need for a full tool-kit on site. Panels can now be installed with just a couple of spanners. The clips give greater flexibility as posts don't need to be drilled, so panels can be fitted in any configuration and can be adjusted to any height.

## DOORS

Doors are available as singles or doubles, with hinged and sliding options, in both standard and bespoke sizes. Featuring 25x25mm mesh on a 25x50mm box frame.

## ROOFS

All stor**GUARD** enclosures can be supplied with a roof if the project requires. Available in varying mesh apertures, including 25x25mm for Aerosol Cage applications.

## FINISHES

All of our cages are finished with a Semi-Gloss RAL 7035 (Light Grey) Powder-Coat as standard. Our in-house powder coating facility gives you the freedom to pick any colour you need to match the aesthetic of your warehouse. All-Weather finishes are also available for outdoor or freezer applications.
