Key Features

Internal sprung loaded, self levelling platform to reduce bending and back strain when loading or unloading.

Robust with tried and tested design that includes galvanised steel box section bases.

Low maintenance and hygienically easy to clean or disinfect with no finger trapping points.

Roof slopes from front to back offering maximum protection for your linen or contents.

Materials used will not corrode offering years of service and plastic main body reduces damage to walls and doors.

The main plastic part can be moulded in different colours and Logo's and screen printing can be applied.
